

View from the "mountains" to the piers

Under the system of "the mountains" flows the area of the piers and the historical buildings of the old warehouses. These buildings contain museum, relaxing centres, shops, exhibition spaces, studios and art galleries

The green "mountains" link all the existing green areas on the waterfront and the new green and public spaces. The "mountains" are a combination of natural and artificial structures that include functions linked to the former foreign settlement behind the waterfront.
